IOM Aims

¹ **Safe:** Avoiding injuries to patients from the care that is intended to help them.

² **Timely:** Reducing waits and sometimes harmful delays for both those who receive and those who give care.

³ **Effective:** Providing services based on scientific knowledge to all who could benefit and refraining from providing services to those not likely to benefit (avoiding underuse and overuse, respectively).

⁴ **Efficient:** Avoiding waste, including waste of equipment, supplies, ideas, and energy.

⁵ **Equitable:** Providing care that does not vary in quality because of personal characteristics such as gender, ethnicity, geographic location, and socio-economic status.

⁶ **Patient-Centered:** Providing care that is respectful of and responsive to individual patient preferences, needs and values and ensuring that patient values guide all clinical decisions.

ACGME Competencies

⁷ **Patient care:** that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health.

⁸ **Medical Knowledge:** about established and evolving biomedical, clinical, and cognate sciences (e.g. epidemiological and social-behavioral) and the application of this knowledge to patient care.

⁹ **Interpersonal and communication skills:** that result in effective information exchange and teaming with patients, their families and other health professionals.

¹⁰ **Professionalism:** as manifested through a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to a diverse patient population.

¹¹ **System-based practice:** as manifested by actions that demonstrate an awareness of and responsiveness to the larger context and system of health care and the ability to effectively call on system resources to provide care that is of optimal value.

¹² **Practice-based learning and improvement:** that involves investigation and evaluation of their own patient care, appraisal and assimilation of scientific evidence, and improvement in patient care.
