

EpicCare Inpatient: POCT – Manual Entry

POCT Results

Usually, when a Point Of Care Test (POCT) is performed, the result from the glucometer or I-STAT is automatically transmitted to Epic. Sometimes the result does not transmit. An example would be when an invalid CSN is used as the patient ID. When the result does not transmit from the device to Epic, you must:

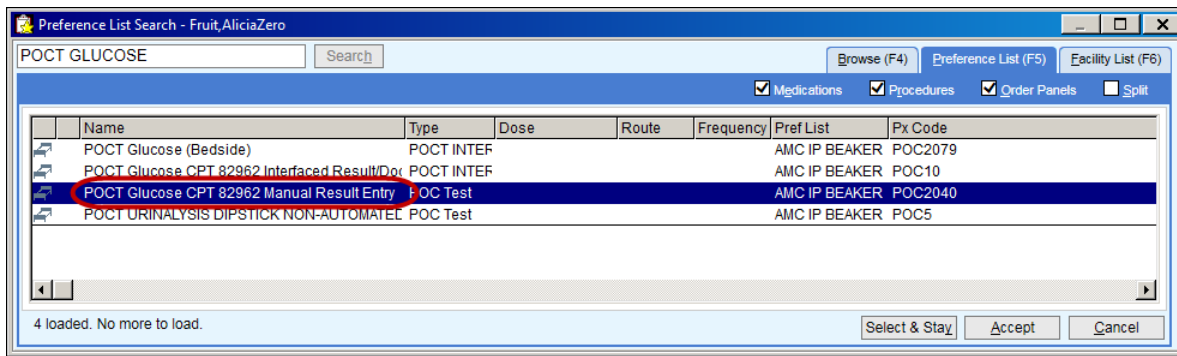

1. Enter a “manual entry” order.
2. Use Enter/Edit results to manually enter the results.

Enter a “Manual Entry” Order

These instructions use POCT glucose as an example.

1. Search for and select the “manual entry” order : POCT Glucose CPT82962 Manual Result Entry. For inpatients, use Manage Orders.

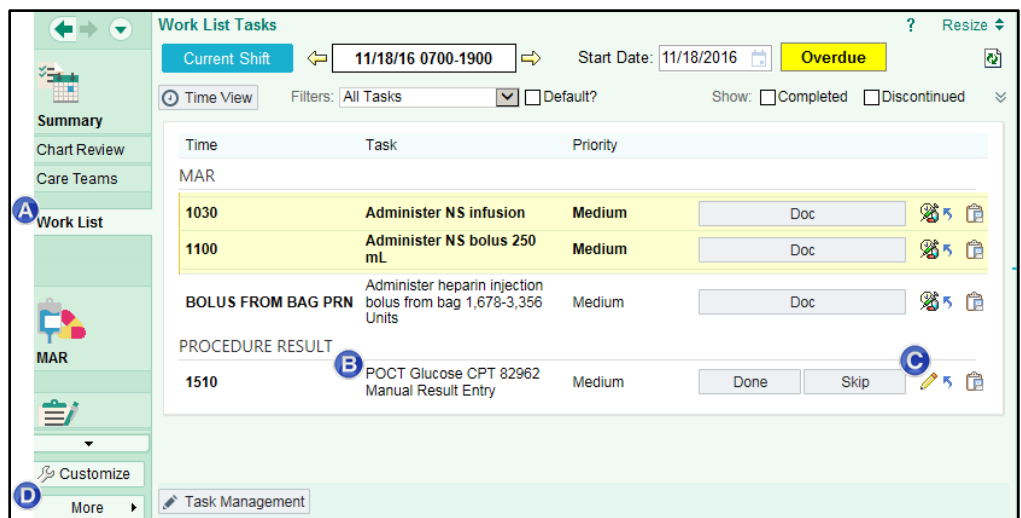

Note: For ambulatory patients, see the tip sheet on Epic Central: [EpicCare Ambulatory: POCT – Manual Entry](#).

2. Sign the order; use the Order mode: Per Protocol: No Co-Sign

Manually Enter Results

1. Navigate to Enter / Edit Results.
2. Find the POCT Manual Entry order. For **inpatients**, you can easily navigate to Enter/Edit Results AND find the correct order by:
 - a. Open the patient’s Work List.
 - b. Find the POCT Manual Entry order.
 - c. Click the pencil icon.
 - d. For **ambulatory** (or inpatient), you can use: More > Enter/Edit Results and look for the order.

Tip Sheet

- 3. Enter the POCT results, and click Accept.
 - Note: You must address all required fields indicated by the red stop signs.
